Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 9, 12, 14, 15-19, 24, 27 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Reddy et al. 6,844,386.
3. Reddy et al. disclose halogen containing polymer and overbased alkaline earth metal salt of a fatty acid in claim 1, oleic acid in claim 4, microemulsion in claim 5, metals in claims 6-8, tin stabilizer in claim 26, hydrocarbon diluent in column 4, lines 30-31, surfactants in the paragraph overlapping columns 4 and 5, solvents in column 4, lines 51-64, blends of organotin stabilizers with overbased calcium carboxylate in column 11, lines 15-26. For PVC and copolymers with additives, see column 8, lines 7-54. Applicants' claims are not novel.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1714

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bohen et al. 4,115,352 or Jennings et al. 3,764,571, in view of Reddy et al. 2003/0050490 or Exxon Chemical EP 0 837 094.

7. The examiner accepts the conclusions of the International Searching Authority in their entirety. See claims 7-10, Example 38 and Table 2 of Bohen et al., From column 20, line 15, to column 23, line 5 of Jennings et al., claims 1-25 or Reddy et al. and page 3, lines 2-40 and claim 1 of Exxon. It is well settled that it is matter of obviousness to combine two or more materials, when each is taught by the prior art to be useful for the same purpose. In re Kerkhoven, 205 USPQ 1069, 1072 (CCPA 1980). It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to use the microemulsions of Reddy et al. or Exxon in the compositions of Bohen et al. or Jennings et al., in order to take advantage of the stability of the microemulsions.
